AFRICAN WITCH DOCTORS.

It seems probable that the present native liscontent in Matabeleland is largely due to the efforts made by the Administration of the efforts made by the Administration. has been established that a lambus dioctor was largely concerned in stirring up rebellion. These witch doctors played an important part in the administration of the Matabele kingdom in the days of Lobengula. They were at once the high priests and leading bards of the nation. The chief witch doctor is a sort of Primate of Matabeleland.

MORAVIANS AS MISSIONARIES. Some cynic has computed that Jews as converted to Christianity at a cost of something over £1,000 a head. However that may be, the statistics of the Moravian Brotherhood leave no room for smeering. The Moravians have fourtishing missions in Africa and other benighted regions, and the total number on the registers of their mission stations is over \$3,000. The cropnes, of which more than two-thirds is raised in the mission fields, is only £9,000. Divide the latter figure by the former and the average annual cost of each convert comes out at less than £1. Deduct the native contributions and the cost runs down to £2, £4. Anglers are certainly a convivial class, and in the close season the clubs make up to some extent for the want of fishing by holding their annual dinners or suppers. These are always enjoyable functions, for, as Walton has it, "Tis the company and not the charge that makes the feast." Among those already announced are the Walworth Waltonians, St. John's, Earlefield, Waltham Green, United Brothers, Cambridge Heath, St. Albans, Woolwich Brothers, and Royal George.

The Piscatorial Society had a capital meeting at the Holborn Restaurant on Monday last, over which Mr. T. Crumplen presided. Dr. Brunton gave an excellent dissertation on the "Mechanics of Angling," very cleverly dealing with hook, winch, and rod. The learned doctor strongly advocated the use of bayonet-pointed hooks, fashioned at the point only after the pattern of a surgical needle, an idea originating with himself and assented to by many practical ang-

Purchasers of flowers in the London streets often remark that they have somehow parted with their proper perfumes, and substituted a rank odour of garlic. It was always a puzule to me how this happened until the other day I chanced upon a cart heavily laden with wall-flowers and onions in alternate layers. If this practice be common, no won-der that our flower girls sometimes smell as if they had been heavily feasting on fried "ingina." Down in the Scilly Isles the flower growers are most particular in taking care that their floral goods never come into con-lact with smelling produce, either during

Witness pursued, the could not eatch prisoner. schoolboy—of the latter-day type. He has pos-sibly quite recently read how the great Harold, though serely wounded, continued to lead his men on the field of Senlac until he fell neath the blows of Euslace of Boulogns and his sup-ports, and also how his lady love, Ediths, aided the monks in their search for his mutilated body. The scene at Madame Tussaud's represents the gentle lady throwing her gird-stricken form on the remains of the warrior, with the holy fathers tranding near. The picture is a beautiful one, and the effect is enhanced by realistic scenery and by the clever illumination for the bright armour and accourtements, which are thus con-trasted with the generally sombre tone of the seens.
